

Powerful Partnerships

Meaningful strategic partnerships are the foundation for our success. These relationships allow WENDT to focus our resources on what we do best, and to tap into the resources of what they do best.

With over 10,000 machines in operation in over 80 countries, TOMRA Sorting Solutions is leading the resource revolution with transformative technologies and sensor-based systems for optimal material separation and recovery.

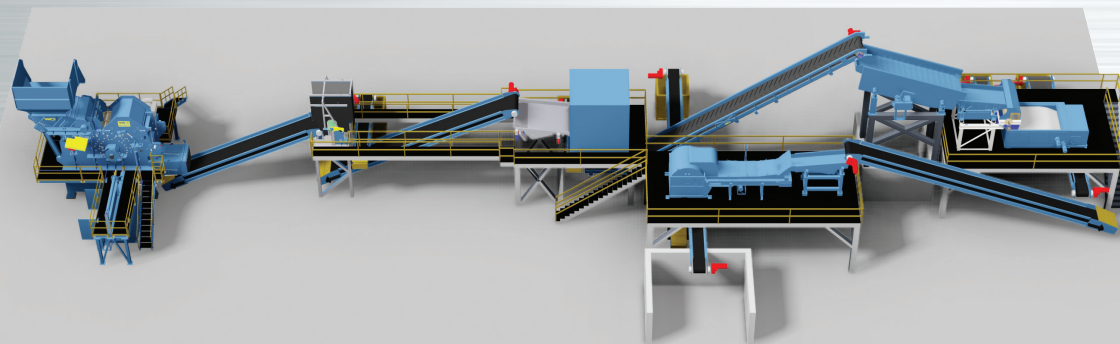

MTB is one of the largest non-ferrous processors in Europe, shredding and granulating more than 40,000 tons per year of non-ferrous materials. MTB's experience and know-how as an operator is carried through into their design and manufacturing of robust, purpose-built non-ferrous processing equipment.

Bowe Machine Company is synonymous with shredding, offering shredder rotors for all machines regardless of the original equipment manufacturer.

Custom-Designs, Fully-Integrated Turnkey Solutions

Technical Proficiency in:

- Shredding
- Screening
- Air Classification
- Magnetics
- Eddy Currents
- X-Ray Density Sorting

ADVANCED TECHNOLOGY. PROVEN PERFORMANCE.

Who we are

For over 35 years WENDT has been servicing the scrap industry as a world-leading manufacturer and systems integrator of shredding, metal recovery and sorting systems. Our innovative designs coupled with the development of new technologies and process solutions help our customers to produce **furnace-ready** products.

We partner with industry-leading technology suppliers and continue to invest heavily in engineering, testing, manufacturing, support systems and capabilities. These investments extend to research and development and process improvement resources such as our state-of-the-art Technology Center. The Technology Center

features some 15 pieces of processing, screening, sorting and conveying equipment and enables us to test new applications, process theories, products and design evolutions.

Our comprehensive product line, purpose-built for the scrap industry, along with parts, services and post-sale support allow us to work with our customers from concept throughout the life of a plant.

With a focus on continuous improvement WENDT offers our customers a powerful resource to optimize their bottom lines.

ALUMINUM
SHREDDING & SORTING

Shredding

- Shred Baled or Loose Aluminum with a Hammermill Including:
 - UBC's
 - Extrusions
 - Sheet
 - Cast
 - Taint Tabor
 - Breakage
 - Wire Cables
 - Siding
- Process Up to 30 TPH with a Single Shredder
- Modular Design Installs on a Flat Concrete Slab, Saving Time & Money

Sorting

- Technology to Remove Contaminants Including:
 - Zinc
 - Brass
 - Lead
 - Waste
 - Copper
 - Stainless Steel
 - Ferrous
 - 2xxx & 7xxx Alloys
- Complete Sorting Systems
- Customized Process Lines to Meet Your Throughput Requirements
