

YOU'VE GOT CONCERNS.

WE'VE GOT SOLUTIONS.

.....
**Environmental
Regulations**

WENDT is at the forefront of emissions control solutions with an exclusive process and technology to keep auto shredders in EPA compliance. From simple water injection systems to the most advanced particulate, VOC and acid gas treatment, our flexible solutions satisfy your regulatory needs. With WENDT's experience, we assist customers through the entire environmental compliance process.

WENDT is designing and building the future of scrap processing plants today. Innovative solutions that are smarter, cleaner, safer and more productive than ever before.

Spend just one day with us to discover what your future could look like.
